## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1-45 have been considered but are moot in view of the new ground(s) of rejection.

### ***Status of Claims***

2. Claims 1-45 are pending in the present application. Claims 3, 4, 7, 17, 23, 24, 26, 32, 33, and 36, are withdrawn.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 3761

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1, 2, 5, 6, 8-16, 18-22, 25, 27-31, 34, 35, and 37-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ronn et al. USPN 6648864.

Regarding claims 1, 2, 5, 22, 25, 29-31, 34, and 39-45 discloses a visual identification device for absorbent articles comprising: two or more size designations and two or more product designations (Figure 4a). Ronn does not specifically disclose two or more absorbency designations. However, because the display designates different sizes and different stages of development, it would have been obvious to one of ordinary skill in the art at the time the invention was made to inform the consumer about different absorbencies, since the general concept is to provide a fit appropriate for the child's state of development and it is considered obvious that different sizes and particularly different stages of development, such as a training pant, has different levels of absorbency. For example, Glaug USPN 5649914 teaches a toilet training aid with a low absorbent capacity.

As to claims 6 and 35, see Figures 4a-5a.

As to claims 8, 9, 27, 28, 37, and 38, see Figure 4a where the products have graphical codes denoted by indicia as broadly as claimed.

As to claims 10 -16 and 18-21, see col. 2, lines 15-46.
